

Diabetes Medical Management Plan (DMMP)

This plan should be completed by the student's personal diabetes health care team, including the parents/guardian. It should be reviewed with relevant school staff and copies should be kept in a place that can be accessed easily by the school nurse, trained diabetes personnel, and other authorized personnel.

CHECKING BLOOD GLUCOSE

Target range of blood glucose: 70-130 mg/dL 70-180 mg/dL
Other:
Check blood glucose level: Before lunch Hours after lunch
2 hours after a correction dose Mid-morning Before PE After PE
Before dismissal Other:
 As needed for signs/symptoms of low or high blood glucose As needed for signs/symptoms of illness
Preferred site of testing:
Brand/Model of blood glucose meter:
Note: The fingertip should always be used to check blood glucose level if hypoglycemia is suspected.
Student's self-care blood glucose checking skills:
Independently checks own blood glucose
May check blood glucose with supervision
Requires school nurse or trained diabetes personnel to check blood glucose
Continuous Glucose Monitor (CGM): Yes No Brand/Model: Alarms set for: (low) and (high)
Note: Confirm CGM results with blood glucose meter check before taking action on sensor blood glucose
level. If student has symptoms or signs of hypoglycemia, check fingertip blood glucose level regardless of

CGM

HYPOGLYCEMIA TREATMENT

Student's usual symptoms of hypoglycemia (list below):

If exhibiting symptoms of hypoglycemia, OR if blood glucose level is less than _____mg/dL, give a quick-acting glucose product equal to______ grams of carbohydrate.

Recheck blood	glucose in 10-1	5 minutes	and repeat	treatment if	f blood	glucose	level is
less than	mg/dL.						

Additional treatment:

Diabetes Medical Management Plan (DMMP) — Page 3

HYPOGLYCEMIA TREATMENT (Continued)

Follow physical activity and sports orders (see page 7).

- If the student is unable to eat or drink, is unconscious or unresponsive, or is having seizure activity or convulsions (jerking movements), give:
- Glucagon: 1 mg 1/2 mg Route: SC IM
- Site for glucagon injection: arm thigh Other:
- Call 911 (Emergency Medical Services) and the student's parents/guardian.
- Contact student's health care provider.

HYPERGLYCEMIA TREATMENT

Student's usual symptoms of hyperglycemia (list below):

Check	Urine	Blood for ketones every	hours when blood glucose levels

are above _____ mg/dL.

For blood glucose greater than _____ mg/dL AND at least _____ hours since last insulin dose, give correction dose of insulin (see orders below).

For insulin pump users: see additional information for student with insulin pump.

Give extra water and/or non-sugar-containing drinks (not fruit juices): _____ounces per hour.

Additional treatment for ketones:

Follow physical activity and sports orders (see page 7).

- Notify parents/guardian of onset of hyperglycemia.
- If the student has symptoms of a hyperglycemia emergency, including dry mouth, extreme thirst, nausea and vomiting, severe abdominal pain, heavy breathing or shortness of breath, chest pain, increasing sleepiness or lethargy, or depressed level of consciousness: Call 911 (Emergency Medical Services) and the student's parents/ guardian.
- Contact student's health care provider.

INSULIN THERAF	Y (Continued)
When to give ins	ulin:
Lunch	
	coverage only
	coverage plus correction dose when blood glucose is greater than andhours since last insulin dose.
Other:	
Snack	
No coverage fo	or snack
Carbohydrate o	coverage only
Carbohydrate c	overage plus correction dose when blood glucose is greater than
mg/dL a	and hours since last insulin dose.
Other:	
Correction dos	e only:
For blood glucose	greater thanmg/dL AND at least hours since last
insulin dose.	
_	
Other:	
Fixed Insulin The	ару
Name of insulin:	
Units of	insulin given pre-lunch daily
Units of	insulin given pre-snack daily
Other:	
Parental Authoriz	ation to Adjust Insulin Dose:
Yes No	Parents/guardian authorization should be obtained before administering a correction dose.
Yes No	Parents/guardian are authorized to increase or decrease correction dose scale within the following range: +/units of insulin.
Yes No	Parents/guardian are authorized to increase or decrease insulin-to- carbohydrate ratio within the following range: units per prescribed grams of carbohydrate, +/ grams of carbohydrate.
Yes No	Parents/guardian are authorized to increase or decrease fixed insulin dose within the following range: +/ units of insulin.

INSULIN THERAPY (Continued)

Student's self-care insulin administration skill

Yes
 No Independently calculates and gives own injections
 Yes
 No May calculate/give own injections with supervision
 Yes
 No Requires school nurse or trained diabetes personnel to calculate/give injections

ADDITIONAL INFORMATION FOR STUDENT WITH INSULIN PUMP

Brand/Model of pump: T	Type of insulin in pump:
Basal rates during school:	
Type of infusion set:	
For blood glucose greater thanmg/o hours after correction, consider pum parents/guardian.	dL that has not decreased within p failure or infusion site failure. Notify
For infusion site failure: Insert new infusion s	et and/or replace reservoir.
For suspected pump failure: suspend or remove pen.	ve pump and give insulin by syringe or
Physical Activity	
May disconnect from pump for sports activities	
Set a temporary basal rate Yes No	% temporary basal for hours
Suspend pump use 🗌 Yes 🗌 No	
Student's self-care pump skills:	Independent?
Count carbohydrates	Yes No
Bolus correct amount for carbohydrates consumed	d 🗌 Yes 🗌 No
Calculate and administer correction bolus	🗌 Yes 🗌 No
Calculate and set basal profiles	🗌 Yes 🗌 No
Calculate and set temporary basal rate	Yes No
Change batteries	🗌 Yes 🗌 No
Disconnect pump	🗌 Yes 🗌 No
Reconnect pump to infusion set	Yes No
Prepare reservoir and tubing	Yes No
Insert infusion set	🗌 Yes 🗌 No
Troubleshoot alarms and malfunctions	Yes No

Yes No Requires school nurse/trained diabetes personnel to count carbohydrates

PHYSICAL ACTIVITY AND SPORTS

A quick-acting source of glucose such as glucose tabs and/or sugar-containing juice must be available at the site of physical education activities and sports.						
Student should eat 15 grams 30 grams of carbohydrate dother						
before every 30 minutes during after vigorous physical activity						
other						
If most recent blood glucose is less than mg/dL, student can participate in						
physical activity when blood glucose is corrected and above mg/dL.						
Avoid physical activity when blood glucose is greater than mg/dL or if urine/ blood ketones are moderate to large.						

(Additional information for student on insulin pump is in the insulin section on page 6.)

Diabetes Medical Management Plan (DMMP) — page 8

DISASTER PLAN

To prepare for an unplanned disaster or emergency (72 HOURS), obtain emergency
supply kit from parent/guardian.
Continue to follow orders contained in this DMMP.
Additional insulin orders as follows:
Other:

SIGNATURES

This Diabetes Medical Management Plan has been approved by:

Student's Physician/Health Care Provider	Date	
I, (parent/guardian:)	give permission to the school nurse	
or another qualified health care professional or trained diabetes personnel of		
(school:)	_ to perform and carry out the diabetes care	
tasks as outlined in (student:)	's Diabetes Medical Management	
Plan. I also consent to the release of the information contained in this Diabetes Medical		
Management Plan to all school staff members and other adults who have responsibility		
for my child and who may need to know this information to maintain my child's health		
and safety. I also give permission to the schoo	l nurse or another qualified health care	
professional to contact my child's physician/he	ealth care provider.	

Acknowledged and received by:
